

STADIA

*Synergy | Innovation
Excellence*

**SINCE
2010 G.C**

GREETINGS

I would take great pride in welcoming you to STADIA Engineering Works Consultant Plc. STADIA has been established on September 2010 and been actively offering a full range of tailored consulting solutions on consultancy services in road and bridge sector. STADIA is a Grade I engineering consultants based in Ethiopia, and has a strong motivation to work on regional, national and international projects.

The organization is arranged to give clients the best possible service by developing the organization constantly to keep abreast of technological developments. Our goal is to provide with optimum service by utilizing a partnership approach to help our customers in the most efficient and effective way. The quality assurance procedures adopted are very effective and are updated regularly to match new requirements.

STADIA places special emphasis on the ability of co-operation and synergetic innovation. It is the company's constant aspiration to maintain its core values of team work, professionalism, and dynamism in the business mix. Our company values lie in the happiness of our employees and appreciation from our customers.

I would like to once again welcome all on board for realization of STADIA's vision as we strongly believe that our strength is nothing without active support of all esteemed stakeholders.

Sincerely
Tadele Amsalu
General Manager.

OUR VISION

To be a Competent International
Engineering Works Consultancy
Institution.

Provide high Quality and Cost
effective Engineering Works
Consultancy Services in time
to our Clients by keeping strong
teamspirit, innovation and
dynamism.

OUR CORE VALUES

Innovation
Ethical
Synergy
Dynamism
Excellence

STADIA

IN A NUTSHELL

WHY STADIA?

STADIA Believes and is constantly driven by Excellence.
For us, Excellence means always Exceeding Client's Expectations.

HOW STADIA DOES IT!

We Constantly Excel by Thinking Contextually and Innovating Synergistically with All. For us every project is unique which requires defining the specific contexts through a collaborative, interdisciplinary approach involving all constituents. Defining the specific contexts leads to defining multiple and always competing objectives. The puzzle that leads to Synergetic Innovation is the Scientific and as well Artistic Approach of arriving at an Optimum Solution that strikes the Right Balance between the Multiple and often Competing Objectives.

WHAT STADIA PROVIDES!

STADIA provides High Quality and Cost effective Engineering Works Consultancy Services in Time to its Clients.

MAIN AREAS OF EXPERTISE

TRANSPORTATION PLANNING AND FEASIBILITY STUDY

Striving to ensure feasibility of projects through taking into account of multiple criteria which accounts all the various determinants. We also deliver proper modelling, analysis and planning of transportation systems with the latest state of art.

BUILDING DESIGN AND SUPERVISION

Ndeavour quality, comfort, inclusiveness, compatibility, sustainability and safety by providing proper design and quality control systems.

TOPOGRAPHIC SURVEYING AND DESIGN

Provide robust designs through systematic study & accurate modelling of the topography towards quality, optimized economy and safe designs.

ENVIRONMENTAL ENGINEERING

Contributes its share through engineering solutions to protect the natural environment while utilizing natural resources as it is everyone's responsibility to protect the environment as well as the resources in it.

HYDRAULIC AND STRUCTURAL ENGINEERING DESIGN

Provide safe, economic and latest technology design of structures by using up- to-date design principles and state of the art software.

PREPARATION OF ENGINEERING COST ESTIMATE

Prepare reasonable and updated Cost Estimate throughout the dynamic market conditions taking account of variable determinants.

GEOTECHNICAL ENGINEERING, MATERIAL TESTING AND PAVEMENT DESIGN

Deliver professional construction material testing services, reasonable pavement designs and geotechnical solutions using the latest technology in this engineering practice era.

PREPARATION OF TENDER DOCUMENT

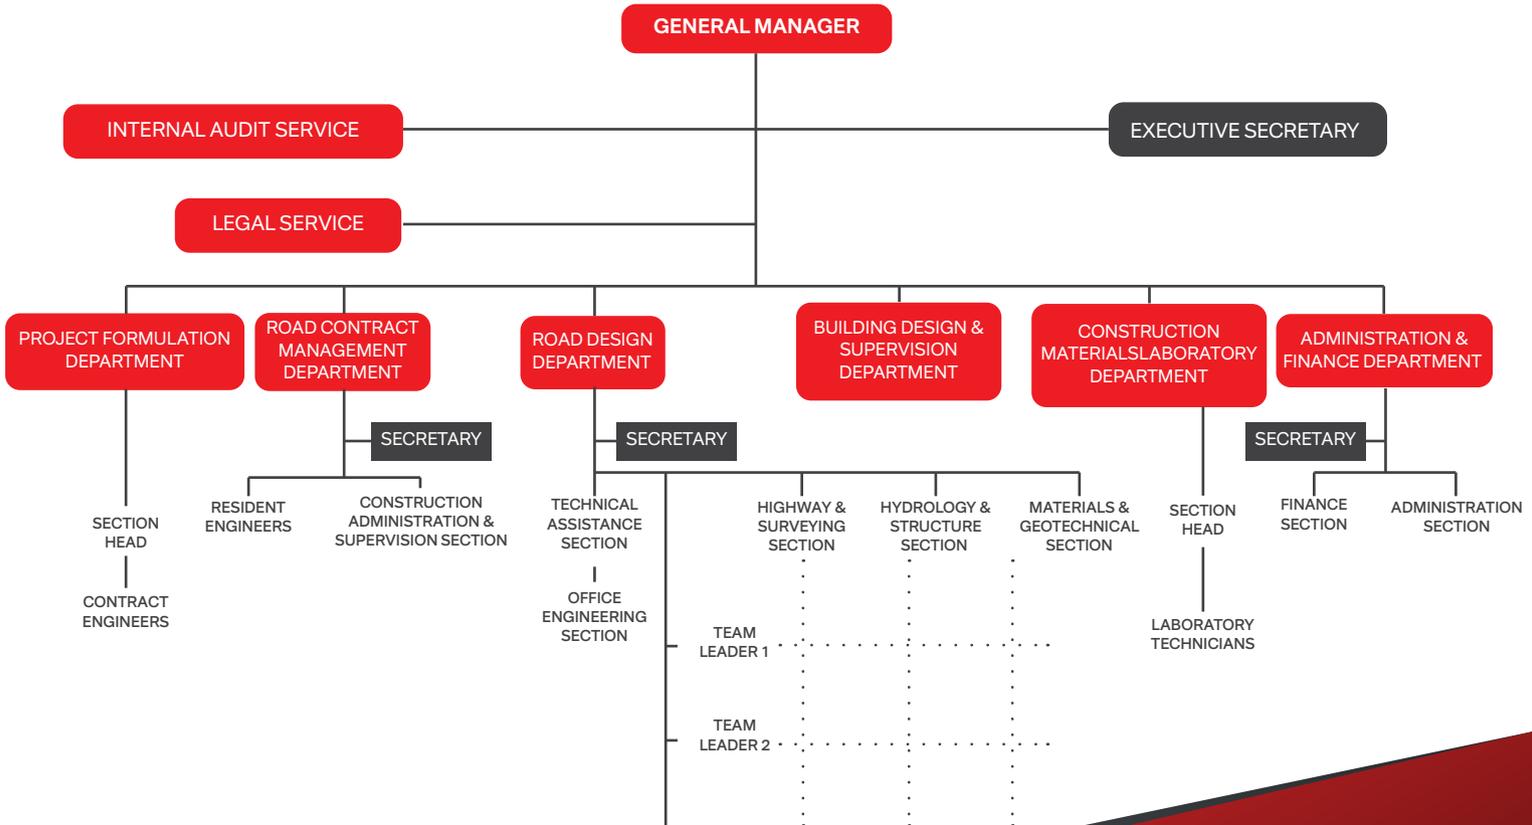

STADIA strives in assuring sufficiency during tender document preparations to avoid undesirable contractual claims and variations.

MANAGEMENT OF CIVIL ENGINEERING CONSTRUCTION

Adopting the principles of Total Quality Management are duly implemented towards the objectives of the project i.e. Quality, Cost and Time with effective and synergetic collaboration of stake holders.
